CUSTOM FITTED BANDS

THE NEXT GENERATION IN ORTHODONTICS

- Created directly from your initial scan
- Precise fit and improved patient experience
- Saves an appointment for spacers
- Bands are not subgingival
- Removes the need for band inventory
- Attachments easily added (i.e., hooks or buccal tubes)
- All laser welded so will not break
- Silver solder is optional and only for appearance and smoothness
- Proven bonding protocol emailed when you send the first case
